

Trimlux Displays

Wall Display Plate

Our wall display plate provides all the information your customer requires to consider the purchase. The display plate provides information on the profile range and the unique benefits of the TRIMLUX sealing system. Our tile to trim sample shows your customers how TRIMLUX would appear around a bath or shower tray. The lower ledge is dedicated to the provision of renewable flexible samples, highlighting the movement capability of TRIMLUX. This display plate can be fixed to our display stand or surface mounted onto a wall or framework. The display plate measures 33cm (13") wide x 46cm (18") high x 75mm (3") deep.

Floor Display Stand

6 Peg Width 0.4mtr (16")

Height 2.415 mtr (7'11")

Depth 0.55mtr (22")

Capacity 48 No. Silicone

100 No. strips 8 No. Mitre Boxes

10 No. 3 pack wipes

Small Stand can be reduced in height to 2.190 mtrs (7' 2"), the silicone is stored in cardboard boxes.

Wall Display Poster

A 300mm x 360mm poster (as fixed to the wall mounted display above) may be independently located on any wall as desired.

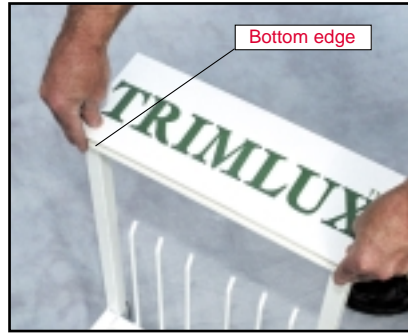

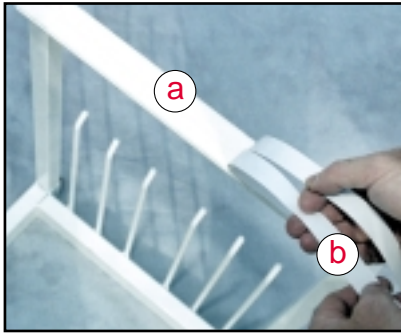

Counter Top Display

Our counter display plate offers TRIMLUX brochures detailing our product range and installation methods. Our "hands on" flexible samples allow close inspection of the movement capabilities of TRIMLUX. The counter display measures 13cm (5 1/2") wide x 15cm (6") deep x 20cm (8") high.

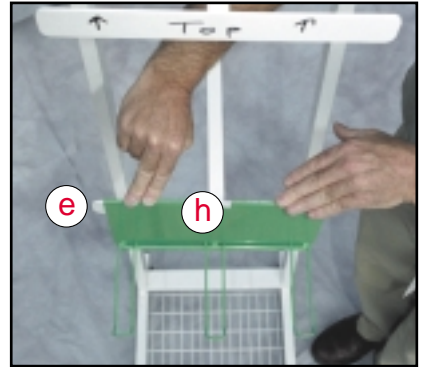

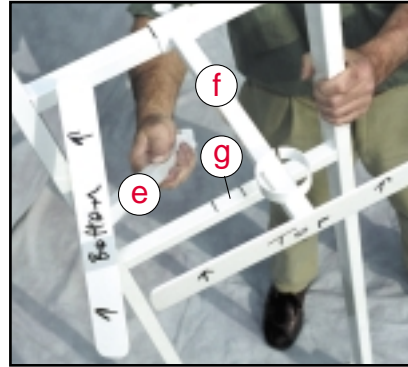

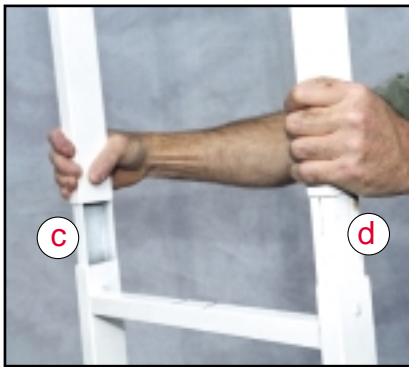

Floor Display Stand Assembly Instructions

1. Place stand base in position and level (adjust feet screws if required).

2. Measure floor/ceiling height. In cases where ceiling height restricts the fixing of the sign above the crossbar (a) as shown above, fix sign after step 11 keeping the top edge of the sign 50mm (2") below ceiling.

3. Remove paper layer (b) from double sided tape to expose adhesive face of tape. Carefully align bottom edge of sign with bottom edge of crossbar using fingers and press firmly onto tape.

4. Slide upper half of display stand onto bottom half connectors (c) and (d) as shown.

5. Align upper and lower display plate supports (e) and (f) inside black marks (g) midway on cross-bars and tighten screws.

6. Hang green accessories plate (h) over front of lower support bracket (e).

7. Slide green display plate over front of two support brackets ensuring it is held level and secure.

8. Insert a tube of TRIMLUX-N (or SEALUX-N) silicone into hoop (h) on upper support bracket (f).

9. Hang accessories onto accessory hooks as shown above.

10. Place silicone crate on stand base and load with TRIMLUX-N (or SEALUX-N) silicone.

11. Hang strips on pegs keeping in order from left to right: Left Half - punched strips (with holes). Right Half - unpunched strips (without holes). Keep labels facing out for customers to read.
